9/20/69

Dear Gary,

Enclosed is a copy of a letter to Paul R. I am pretty certain this is from a Burton memo of 5/8/68, but it bears no identification. It refers to Hemming having met Nelson Hunt and others, hence I thought it adviseable to send it to Paul, from whom I've not heard in some time.

In the course of working over some files I came accross something else I'd forgotten, a memo from Thayer Waldo in which, among other things, he says of the motorcade after the assassination, that the two right-hand cops "turned into the parking lot" when they reached the Trade Mart" and didn't go back onto the road until they realized the motorcade was going on.

I did not recall this and am not certain it is accurate, though it can be. Chaney was one, and he was never a witness and seems to have disappeared from Dallas. I looked for him and the Garrison people also say they did.

Can one of your group trace this through the evidence, if you think it worth the effort?

Nothing new. Quiet day. Worked on files and took Lil shopping.

Hope your silence is because you are hitting the books, not strep throat.

Best,
